Contents

Preface
Contents

1	Introduction	13
1.1	History of Economic Modelling in the Netherlands	14
1.2	Introduction to microsimulation models	17
1.3	Microsimulation models in the Netherlands and abroad	23
1.4	Introduction to ageing in the Netherlands	26
1.4.1	Ageing in the Netherlands in numbers	26
1.4.2	Retirement behaviour in the Netherlands	32
1.4.3	Ageing in the Netherlands in international perspective	33
1.5	Introduction to disability insurance in the Netherlands	36
1.5.1	Disability insurance in the Netherlands	36
1.5.2	Disability insurance in the Netherlands in international perspective	43
1.6	Joint analysis of ageing and disability	44
1.6.1	The ageing-disability relationship in numbers	45
1.6.2	Political context	50
1.7	Overview of the thesis	52
2	A microsimulation analysis of the 2006 regime change in the Dutch disability scheme	55
2.1	Introduction	56
2.2	Disability benefits in the Netherlands	58
2.2.1	Current system of disability benefits	58
2.2.2	Regime change proposed, from 2006 onwards	60
2.2.3	Predictions of the regime change effects at the macro level	62
2.3	The Microsimulation model	63
2.3.1	Microsimulation versus cell-based macro-forecasts	63
2.3.2	Model choice	64
2.3.3	Model structure	66
2.4	Implementation of the simulation model	68
2.4.1	The base-data set	68
2.4.2	Imputation of missing data	72
2.4.3	The simulation module	73
2.4.4	The behavioural model	75
2.4.5	Model validation	77
2.5	Results of the simulation model	78
2.5.1	Macro results	79
2.5.2	Micro results	85

2.5.3	Sensitivity analysis	88
2.5.4	Redistribution effects of the regime change	91
2.6	Conclusion	93
	Appendix 2.A The behavioural model	97
	Appendix 2.B The benefit formulas	99
3	Estimating the effects of recent disability reforms in the Netherlands	103
3.1	Introduction	104
3.2	The Dutch disability insurance schemes	106
3.2.1	History and past policy measures until the end of the 1990s	106
3.2.2	Recent policy changes	109
3.2.3	Literature review	112
3.3	Disentangling the effects of inflow-related policy measures	114
3.3.1	Data	114
3.3.2	Model	116
3.3.3	Estimation results for inflow model	122
3.3.4	Estimation results outflow model	127
3.4	The microsimulation model	130
3.4.1	Introduction	130
3.4.2	Theoretical framework	131
3.4.3	Modelling inflow, outflow and transitions in grade of disability and working status	133
3.4.4	Estimation results	139
3.5	The combined effect of the policy reforms in perspective	142
3.5.1	Combined effect of all policy measures	142
3.5.2	Combined effect of outflow-related measures	145
3.5.3	An integral long-term forecast of all disability schemes	147
3.6	Conclusions and topics for future research	149
	Appendix 3.A Data	152
	Appendix 3.B Parameter estimates for WAO	155
	Appendix 3.C Parameter estimates for WIA	158
	Appendix 3.D Parameter estimates for Wajong	160
	Appendix 3.E Model parameters	163
	Appendix 3.F Detailed output of sector models	165
4	The Social Affairs Department of the Netherlands Ageing and Pensions model	167
4.1	Introduction	168
4.2	Background	169
4.2.1	The Dutch pension system	169
4.2.2	Models currently in use	170

4.2.3	Microsimulation models	173
4.2.4	The SADNAP model	174
4.2.5	Comparison with other dynamic population microsimulation models	177
4.3	Modelling redistribution within the state pension system	178
4.4	Modelling the retirement decision of employees	182
4.5	Model results	188
4.5.1	Budgetary results	188
4.5.2	Redistribution	191
4.5.3	Retirement decision	193
4.5.4	Validation and comparison to other models	197
4.6	Conclusions and topics for future research	199
	Appendix 4.A The SADNAP Model	202
4.A.1	The demographic model	202
4.A.2	The household formation model	206
4.A.3	The participation status model	209
	Appendix 4.B Data sources	212
4.B.1	State pension data	212
4.B.2	Company pension data	214
4.B.3	Macro data sources	218
5	Microsimulations on the effects of ageing-related policy measures	221
5.1	Introduction	222
5.2	The Dutch pension system	224
5.2.1	Institutional setup	224
5.2.2	Current situation	225
5.2.3	Macro forecasts	226
5.2.4	Redistributive characteristics and actuarial fairness of the state pension system	228
5.3	Model and data	229
5.3.1	Model	229
5.3.2	Data sources	230
5.4	Baseline scenario in a micro approach	231
5.4.1	State pension costs in the baseline scenario	231
5.4.2	Retirement age in the baseline scenario	232
5.4.3	Redistribution and actuarial fairness in the baseline scenario	233
5.5	Policy alternatives	235
5.5.1	Overview of policy measures	235
5.5.2	Direct budgetary effects	237
5.5.3	Labour participation effects	242
5.5.4	Redistributive effects	244

5.5.5	Assessment of the policy alternatives	246
5.6	Conclusions and topics for future research	247
Appendix 5.A	Direct budgetary effects	250
6	Conclusion	253
6.1	Discussion on the added value of microsimulation models	253
6.2	Conditions for successful integration of microsimulation models into policy analysis ..	259
6.3	Policy findings on ageing and disability	262
6.4	Directions for future research	266
6.5	Concluding remarks	273
References	275
List of figures	287
List of tables	289
List of abbreviations	291
Samenvatting (<i>Summary in Dutch</i>)	293
